

NPOL Tests

Submitted by tjang on Thu, 2013-05-30 08:01

Date:

Thursday, May 30, 2013 - 08:00

Instrument List:

- [Yellow](#)

Discussion:

NPOL is undergoing tests to determine the source of a noise in the antenna motors. There is a suspected lack of grease on certain gears, but the extent and exact source of the issue is uncertain. NPOL can return to service whenever needed. We are taking advantage of the present lack of weather.

Update: Also doing other testing/maintenance for the next hour or so. Little to no precip in all of Iowa right now.
